DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed April 18, 2007 has been placed in the application file and the information referred to therein has been considered as to the merits.

Allowable Subject Matter

Claims 3-8, 11-17 and 19-20 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and apparatus for enhancing the security of a semiconductor device. Independent claims 1 and 8 recite the uniquely distinct features of "an encryption control section for determining whether to permit execution of each of the sequences which can be executed by the encryption arithmetic processing section, and prohibiting the operation of the encryption arithmetic processing section with respect to a sequence whose execution is determined to be impermissible, wherein the encryption control section includes a mode ID storage register for storing a mode ID; and the encryption control section determines whether to permit execution of each of the sequences based on the value of the mode ID stored in the mode ID storage register". Independent claim 11 recites the uniquely distinct feature of "a program processing section including a through section for inputting/outputting a program as it is, and a program-decryption cryptography engine for receiving an encrypted program from

the external memory, decrypting the encrypted program into a raw (binary) program, and supplying the raw (binary) program to the inside of the semiconductor device".

Independent claim 19 recites the uniquely distinct feature of "reading an original content stored in an irreproducible area of an external memory into an LSI device; generating a data inherent key in the LSI device using an inherent ID stored in an internal memory; encrypting the original content in the LSI device using the data inherent key; and storing the encrypted content in a reproducible area of the external memory. The closest prior arts, Nagamasa et al (US 20040177215) and Fujioka (US 20030005321), each disclose conventional semiconductor devices with security processing functionality fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew B. Smithers whose telephone number is (571) 272-3876. The examiner can normally be reached on Monday-Friday (8:00-4:30) EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Emmanuel L. Moise can be reached on (571) 272-3865. The fax phone
